

# LD40 Lockbolt & Monobolt Tool

Super-charge your productivity with this cutting-edge LD40, cordless Lockbolt and Monobolt battery tool.

## Key Features and Benefits of the LD40 Tool

- LD40 stands out with its exceptional ability to deliver power and portability, making it a valuable asset in the rail, mining, and trucking industries.
- The LD40 is a battery-operated tool that delivers 40 kN of pulling force, allowing operators to install up to 1,000 lockbolts per charge. This eliminates the need for bulky compressors and generators.
- Designed for use in tight spaces, such as rail maintenance environments, the LD40 streamlines operations by reducing downtime and labor costs associated with positioning traditional pneumatic tools.
- Lockbolts and Monobolts can be installed with a simple change of the nose assembly.

<b>Placing capability</b>	Monobolt 3/8" Avdelok 5/16" & 3/8" Maxlok 5/16" & 3/8" Avbolt 5/16"
<b>Tool weight</b>	4kg (without battery)
<b>Installation time</b>	< 3 seconds
<b>Pulling force</b>	40kN
<b>Stroke</b>	25mm
<b>Placements per battery charge</b>	1000 (5/16" Maxlok)
<b>Critical component life</b>	50,000 placements for the gear structure, screw structure and PCB
<b>Battery pack</b>	36V DC 4.0Ah. Power display function, overload protection. Tool kit comes with 2 batteries as standard
<b>Charger</b>	AC 220-240V. Fast charger as standard – full charging time for a 36V 4.0Ah battery ≤ 60min
<b>Drive motor</b>	Brushless 36V DC
<b>Other features</b>	Overload protection, undervoltage protection, high temperature protection
